OUTLINE

Pre-eclampsia, Eclampsia and HELLP
- Tips for timely intervention: Know when you MUST intervene
- Maximize maternal and fetal outcomes: Latest available medical treatments & interventions
- Morbidity and mortality associated with diagnosis
- Case Studies

Preterm Labor: Rapid Diagnosis And Intervention Can Make all the Difference
- Who is at the highest risk? and what you can do to lower it
- Preterm labor or just contractions?
- Beta-mimetics, Mag, Calcium channel blockers, NSAIDS; antibiotics. Who gets what?

The Perils of Shoulder Dystocia
- Can we predict shoulder dystocia? When a shoulder dystocia occurs: The essentials of management
- Best first line maneuvers
- Risk management considerations

Post-Partum Hemorrhage
- Patients at risk for postpartum hemorrhage
- New tips for assessing blood loss accurately

OBJECTIVES

1. Evaluate the two-phase process that results in pre-eclampsia.
2. Compare the pharmacologic management options for preterm labor.
3. Determine the two most important factors in assessing risk in elective induction.
4. Explain the most effective way to change medical staff practices related to high risk elective inductions.
5. Interpret the possible causes of a postpartum hemorrhage and appropriate management for each.
6. Discuss strategies for collaborative care with the ICU and Emergency Department.
7. Explain why d-dimer is no longer recommended as part of the evaluation for pulmonary embolism in pregnancy.
8. Utilize the latest ACOG recommendations for preventing blood loss during the delivery with an accreta.
9. Compare the varying degrees of abnormal placental implantation and how management might differ for each.
10. Analyze why neurological outcomes with amniotic fluid embolism are so poor and the rapid interventions that could make a difference.

CANCELLATION POLICY: If you contact us before the event date, you can exchange for a DVD or CD/digital manual package on the subject (self-study continuing education credit may be available), a certificate to attend another seminar, or receive a tuition refund less a $30 cancel fee. Substitutions are permitted at any time.

Jamie Otremba, MSN, RN, CNM, will delve into the most common obstetrical emergencies presenting in today’s obstetrical patients. She will provide you with a comprehensive look at pre-eclampsia, eclampsia, HELLPs; the pitfalls of diagnosing and treating preterm labor; shock, dystocia, abruptio placenta, hemorhage, placenta acreta, amniotic fluid embolism, venous thrombosisembolism, VBACs, and inductions. Jamie’s extensive experiences in high risk obstetrics have provided her with keen insight into these often challenging and frightening situations. She is eager to share with you many of the effective interventions that she has acquired through her career!

Through enlightening case studies, persuasive evidence-based research, and an engaging presentation style, she will teach you the current trends, treatments and issues in high risk obstetrics. Attend this seminar to learn new strategies and techniques that can immediately impact the maternal and fetal outcomes of your obstetrical patients!

Live Seminar Continuing Education Credit Information

PESI, Inc. is an approved provider of continuing education for the American Nurses Credentialing Center’s Continuing Professional Education Recognition System (CE/B) and is accredited as a provider of continuing education by the American Nurses Credentialing Center (ANCC). PESI, Inc. recommends only those hours actually spent participating in the CME activity.

For information about state credit approval, please see your certificate of successful completion and a copy of the seminar brochure to the Boards of Nursing in your state.

Information obtained in this course should be used within your scope of practice.

Certified Nurses, Midwives, and Nurse Practitioners: PESI, Inc. is accredited by the American Nurses Credentialing Center’s Office of Professional Credentialing as a provider of continuing nursing education. If you are a certified nurse, midwife, or nurse practitioner, this program is available for 6.0 contact hours. Please refer to your certificate of successful completion and a copy of the seminar brochure to your state regulatory board for information about state credit approval.

PESI, Inc. is accredited as a provider of continuing education by the American Academy of Physician Assistant Review Panel. Physician assistants should claim only those hours actually spent participating in the CME activity.

Nonfinancial: Jamie A Otremba is a member of the American College of Nurse Midwives and the American Congress of Obstetricians and Gynecologists.

Neonatal Pocket Guide for NICU Nurses

By Pamela Ann Harris-Hammar, BSN, CNM NNP-BC, RNC-IBC

A collection of quick-point-use reference materials. Topics include: preterm factors, cultural indicators, resuscitation methods, endotracheal tubes, thermoregulation, respiratory medications, cardiology, fluids, electrolytes & nutrition, infectious diseases, pharmacology, bilirubin/neonatal lab values.
