Autism and Sensory Processing Disorder

OVER 75 PROVEN STRATEGIES FOR SOCIAL SKILLS, BEHAVIOR & LEARNING

Featuring Peggy Graham, MOT, OTR/L

- Latest brain research on Autism Spectrum Disorder
- Strategies to promote academic & social success
- Behavior interventions including Applied Behavior Analysis
- Expand play through sensory activities

Objectives

1. Assess how sensory processing, environmental and communication issues influence learning and behavior.
2. Describe the latest brain research on autism spectrum disorders and how these findings impact the way therapists and educators work with children/adolescents.
3. Explain how early sensory-motor experiences are stored in the brain.
4. List the components of sensory integration and sensory processing difficulties common to children with a diagnosis of autism.
5. Examine how early experiences may be perceived differently for children with autism due to brain differences.
6. Summarize how underlying sensory processing difficulties impact learning, behavior and social skills.

Guarantee
